

Product Brochure

- Autumn Edition 2024

Introduction

We specialize in the design and production of LED lighting. Through our carefully crafted intelligent control system, we create three intelligent living and entertainment spaces for everyone:

- 1.the indoor intelligent lighting space,
- 2.the outdoor courtyard intelligent lighting atmosphere,
- 3.the in-car intelligent atmosphere space.

The intelligent lighting systems in these three scenarios create a romantic lighting atmosphere and bring people a pleasant emotional experience.

1. the SYNC TV backlight

1. **Sync to TV:** The LED backlights syncs the colors on the screen through the sensor and responds to sound and light.
2. **Multiple Scene Modes:** The smart tv lights sync featuring multiple scene modes, it can sync with both TV picture and sound via a high sensitivity microphone.
3. **Bluetooth APP & Remote Control:** Easily adjust various effects, colors, brightness, speed.
4. **Easy Installation:** The TV led backlight has self-adhesive glue that can be stuck directly behind the clean screen.

AR sensors pick up colors

Say goodbye to the TV cameras, no invasion of privacy

Enhanced algorithmic capabilities

Interior Car LED Strip Light

Built-in mic, car strip lights can change the color with the music

A photograph of a car's interior with purple LED strip lights installed along the dashboard and door panels. A hand is holding a smartphone connected to the system via a cable. The phone screen displays a color selection interface. Above the car, a colorful equalizer graphic is visible, and musical notes are floating in the air, suggesting the lights change color based on the music being played.

18. Magnet Charging Induction Light

- 1, Battery-powered,
No wiring required.
- 2, Easy installation,
no surface damage needed.
- 3, Freely movable,
Position adjustable at will.
- 4, Fast charging,
long battery life.
- 5, Auto on/off via motion
Sensing (turns on when
Someone approaches,
Turns off when leaving)

PRODUCT SPECIFICATIONS

Name: Magnet Charging Induction Light

Color: White

Charging port: Type-C port

Material: ABS

Light Color: White / Warm Colors

Voltage: 5V

Detection method: Human body sensing

Mode: Auto and Off

Dimensions: 305x67x18 mm

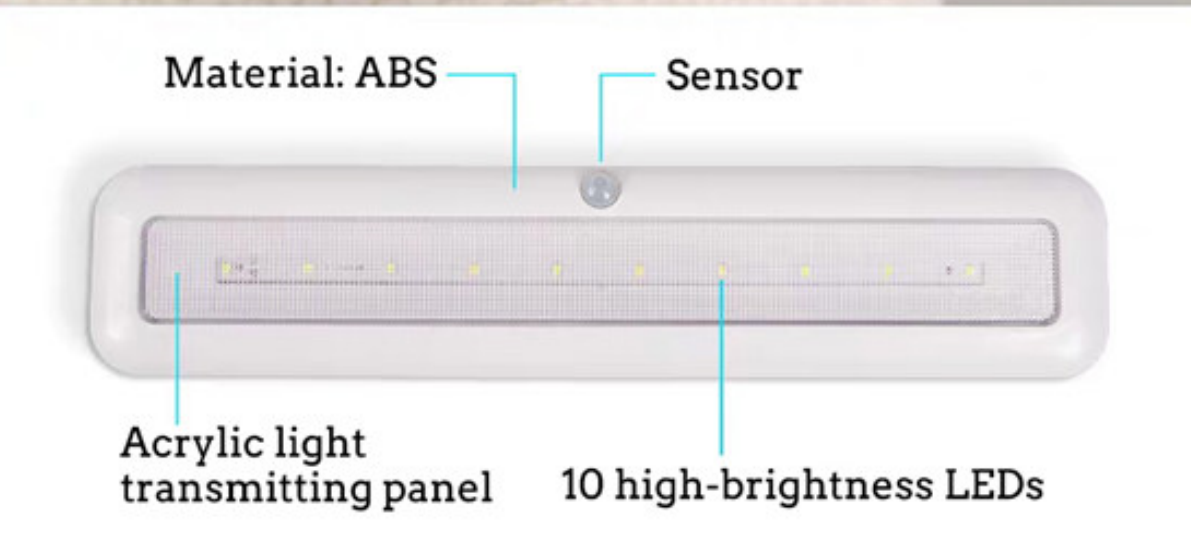

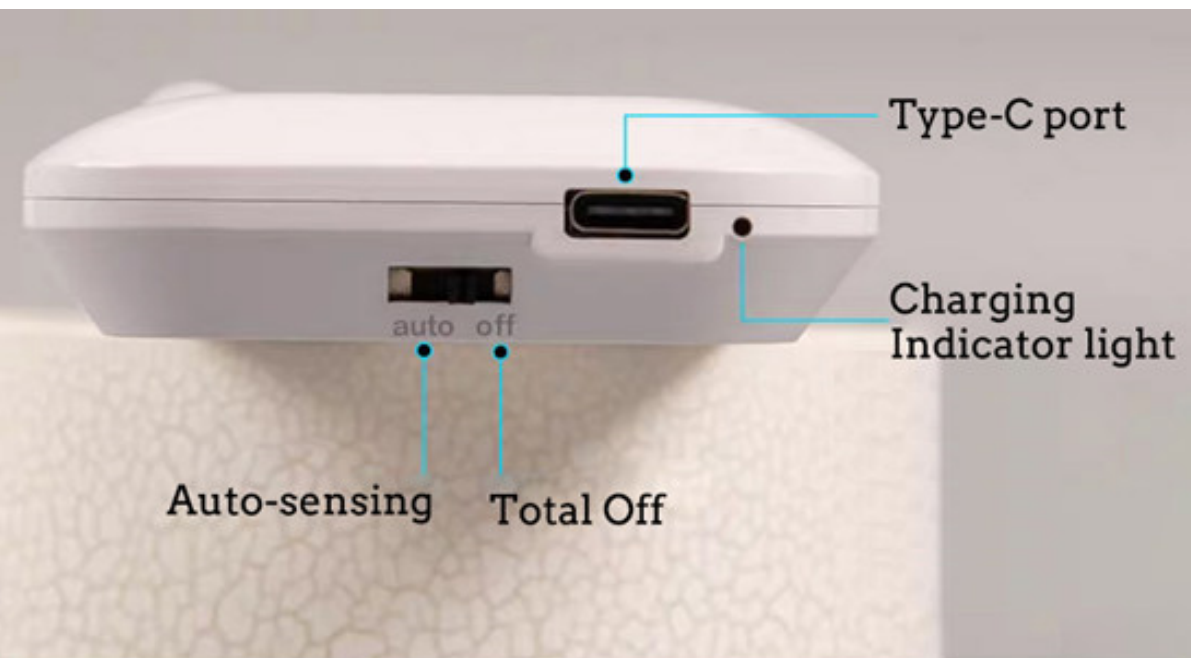

Luminous angle: 120°

Sensing Distance: 0~5 meters

Battery capacity: 600mAh

Application scenarios:

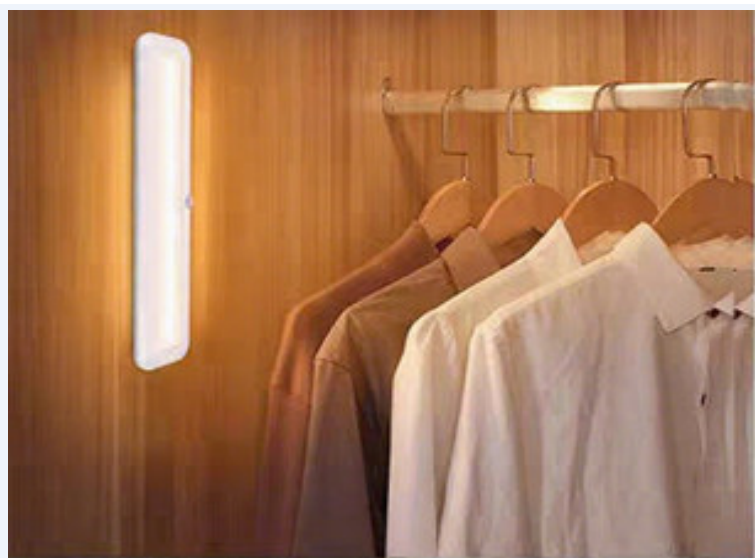

Cabinets, display cabinets, storage cabinets,
wine cabinets, wardrobes, etc.
